

HOW TO RUN THE CODE

- 1) Open the document location in command prompt.
- 2) Then run the two source files.
- 3) Install Packages if not installed prior.
- 4) Run two source files as “python app.py” and “python main.py” as the name of the source files are app.py and main.py.
- 5) A localhost link will be provided in the prompt, click “CTRL+link”, will get redirected to a webpage, then use the features of the web application.
- 6) Provide the grayscale image to get the required output.
